Transcript: 8 elements of digital literacies – Doug Belshaw (extract)

Well we do need some kind of structure, some kind of framework to hang our ideas on. We need some kind of guiding principles. Some essential elements of digital literacies if you will.

Thankfully I think I can help with that. So I've been researching digital literacies for quite a few years now and I've compared it with my experience as a teacher in the classroom and at the moment these are what I believe to be the 8 essential elements of digital literacies: the Cognitive, the Constructive, the Communicative, the Civic, the Critical, the Creative, the Confident, the Cultural. And right at the heart of all of that, I believe, is the Remix.
